SOWING THE SEEDS

for effective agricultural research collaboration with Australia

Agriculture is a significant part of the economies of Australia and Latin American countries. Major investments in research and new technologies across both continents offer opportunities for greater collaboration.

This **webinar** will provide key information on Australia's agricultural, fisheries and forestry research and innovation landscape and how the region can engage with Australian researchers, universities, research and development bodies and industry. It will also help to identify some of the pathways available for institutions in the region to directly engage with agricultural research in Australia.

Speakers include:

Harriet Mellish
General Manager
AgriFutures

Harriet Mellish is General Manager of Global Innovation Networks at AgriFutures Australia. Her team is shaping the future of agrifood technology and innovation by developing and implementing the Global Innovation Networks (GIN) strategy which aims to connect Australia to the global agrifood ecosystem.

Mick Schaefer
CEO | Food Agility CRC

Mick Schaefer has worked in and around Agriculture and AgTech as a research scientist for the past 10 years, with a broad interest in precision agriculture, farming systems, remote sensing and IoT. Prior to taking up the position of Chief Executive Officer of Food Agility CRC in November 2023, Mick was the Assistant Director and Science Team Leader of the Australian Plant Phenomics Centre at CSIRO in Canberra, Australia.
